Christian Al-Shatla

Software Engineering Student | Full-Stack, Mobile & Backend Development
Ramallah / Bethlehem, Palestine | christianshatleh105@gmail.com | GitHub: Christian-Shatleh

PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience developing web, mobile, desktop, and automation-supported solutions. Contributed to a live gym-management platform serving 300+ active users and currently developing VentaFit, a full-stack fitness application. Currently undertaking a 204-hour internship at FTS; completed technical coursework through Boot.dev covering backend development, TypeScript, SQL, HTTP, and developer tooling.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Python, Java, HTML, CSS

Frameworks & Platforms: ASP.NET Core, Node.js, Express, React, React Native / Expo, Tailwind CSS, Flutter, JavaFX, Vite

Backend & Data: REST APIs, PostgreSQL, SQL, Drizzle ORM, Entity Framework Core, JWT authentication, password hashing, SMTP

Tools & Practices: Git/GitHub, Docker, OOP, debugging, testing, Agile teamwork, n8n automation, AI-assisted development

PROFESSIONAL EXPERIENCE

FTS | Software Engineering Internship | In Progress | 204 hours

- Currently completing a 204-hour internship at FTS, gaining professional experience and exposure to real-world software development processes and workflows.
- Developing practical industry readiness through application of software engineering knowledge, problem-solving, and collaborative work in a professional setting.

PROJECTS

AlphaGYM Full System | Team Project | React, Flutter, Hikvision Integration

- Contributed to a live gym-management platform used by 300+ active users, supporting membership data, accounting, analytics, and operations.
- Developed Hikvision card-reader access-control logic and a once-per-day entry rule to reduce membership-card sharing.

VentaFit Fitness Application | Personal Project | React Native / Expo, C#, ASP.NET Core

- Developing a full-stack fitness app for workout planning, nutrition tracking, progress monitoring, and personalized dashboards.
- Building REST APIs with ASP.NET Core and Entity Framework Core, including JWT authentication, secure password hashing, and user flows.

K-12 School Management System | Personal / Commercial Project | Flutter, SMTP, n8n

- Developed a school-management system concept and integrated automated email communications and workflow automation.

Instrumental Shop Application | University Project | Java, JavaFX

- Built a desktop shop application with product browsing, interface navigation, and object-oriented design.

EDUCATION

B.Sc. Software Engineering | Bethlehem University | 2024 - Present

High School Diploma | Talitha Kumi School | 92% overall average | 2024

PROFESSIONAL DEVELOPMENT & TRAINING

Boot.dev | Backend Development & Computer Science Coursework | Completed 2026

- Completed hands-on studies in TypeScript, HTTP and REST APIs, SQL/PostgreSQL, backend server development, Git, Linux/CLI, and Docker.
- Applied concepts through command-line and API projects, including database integration, authentication, testing, and deployment fundamentals.

Backend Development Course | Eng4You | Summer 2026 - In Progress

- Strengthening practical backend skills in C#, ASP.NET Core, APIs, authentication, and databases.

LANGUAGES

Arabic: Native | English: Proficient | German: A2 course in progress; targeting B2 by 2027
